

JAVIER ALZÚ

Software Developer (Frontend)

Chaco, Argentina | +549 3624003042 | javieralzuu@gmail.com

LinkedIn: Javier Alzú | GitHub: github.com/jaalzu | Portfolio: javalzu.vercel.app

PROFESSIONAL PROFILE

Frontend Developer with more than 4 years of experience building web applications and interfaces with JavaScript, TypeScript, React, Next.js, and Astro.

I focus on building interfaces that are clear for users and easy to maintain, with attention to component architecture, UI systems, responsive design, accessibility, performance, and rendering strategies.

I also place strong emphasis on software quality through unit, integration, and end-to-end testing, automation, and TDD practices when they add value to the development process. I enjoy taking part in product and design decisions, questioning solutions, and understanding how frontend decisions affect both the user experience and the long-term evolution of a product.

I also use AI-assisted development tools to speed up iteration, debugging, and problem solving during development.

TECHNICAL SKILLS

Lenguajes y Web:

JavaScript, TypeScript, HTML5, CSS3

Frontend:

React, Next.js, Astro, Svelte, Tailwind CSS, shadcn/ui, Radix UI, GSAP

UI & Component Architecture:

Component Architecture, Design Systems, Responsive Design, Mobile-First, Accessibility, UI Patterns

State & Data:

Zustand, TanStack Query, React Hook Form, Zod

Rendering & Performance:

SSR, ISR, Server/Client Components, Web Performance, Image Optimization, SEO

Testing & Quality:

Vitest, React Testing Library, Playwright, Unit Testing, Integration Testing, End-to-End Testing, TDD

Architecture & Engineering:

Feature-Sliced Design (FSD), Clean Architecture, SOLID, Design Patterns, Modular Architecture

Backend & Services:

Supabase, PostgreSQL, REST APIs, Authentication, Row Level Security (RLS)

Development Tools:

Git, GitHub, GitHub Actions, Docker, Vite, Vercel, Postman, Figma

Languages:

Español (Nativo) · Inglés (B1)

PROFESSIONAL EXPERIENCE

Frontend Developer Freelance

2024 – Present

- Design and develop web applications using React, Next.js, Astro, and TypeScript, focusing on simple, maintainable solutions.
- Work with clients to understand business requirements and turn them into user-focused technical solutions.
- Improve performance, accessibility, and user experience through development best practices and web rendering strategies.
- Design modular frontend architectures, build reusable components, and integrate backend services, authentication, and APIs.
- Implement automated testing, validation, and quality practices to maintain reliable software.
- Automate integration and deployment processes through CI/CD pipelines using tools such as GitHub Actions.

SELECTED PROJECTS

TratoLibre

- Full-stack development of a marketplace for buying, selling, and exchanging products, including real-time messaging and a complete listing workflow.
- Designed a modular architecture based on Feature-Sliced Design, focusing on maintainability and scalability.
- Implemented secure authentication, authorization through Row Level Security, and performance optimizations using the Next.js App Router.
- Built responsive interfaces, data validation, automated testing, and production monitoring.

JavaCourses — Plataforma LMS

- Developed a private e-learning platform with course, lesson, and progress management, including role-based access control.
- Implemented SSR authentication, authorization through RLS policies, and integration with PostgreSQL and Storage.
- Built the interface using Tailwind CSS, Radix UI, and reusable components.
- Implemented form validation, automated testing, and error monitoring to improve product quality.

EDUCATION & TRAINING

- React Specialization — Informatorio (2024)
- Web Development (HTML, CSS, JavaScript) — Coderhouse (2022 – 2023)
- UI/UX Design — Coderhouse (2023)
